The Movable Outdoor Social Kitchen

Cook - Gather - Entertain

KS-PG-20261021 | Public reference | Reviewed 21 October 2026

A kitchen designed around people

KAISTEEL brings cooking, gathering and entertaining together in a movable outdoor kitchen. PRO supports compact spaces and showroom trials; MAX provides a larger social format; CUSTOM is reviewed for project-specific layouts and finishes.

Illustrative scene visualization, not a delivered-customer installation. Equipment, finishes and movement depend on the approved configuration.

Choose the right supply path

System Shell is separately scoped for the structure and agreed non-appliance components. Appliance-Ready prepares openings and utilities for exact buyer-selected appliances and excludes those appliances. Full Package includes only the expressly listed appliances and factory integration after model, voltage, gas and destination review.

Current model configurations

Model	Opening system	Overall size mm
PRO 2300	Motorized roller shutter	2300 x 880 x 2400
PRO 2300	Motorized lift-up	2300 x 880 x 2400
MAX 2900 / 880	Motorized lift-up	2900 x 880 x 2400
MAX 2900 / 960	Motorized lift-up	2900 x 960 x 2400
CUSTOM Compact 2278	Manual lift-up	2318 x 1087 x 2075 open
CUSTOM Compact 2878	Manual lift-up	2918 x 1087 x 2075 open

Full Package reference scope

Configuration	Listed appliance scope
PRO 2300 / Motorized roller shutter	4-burner grill; range hood
PRO 2300 / Motorized lift-up	4-burner grill; refrigerator; hood
MAX 2900 / 880 / Motorized lift-up / 880	4-burner grill; refrigerator; hood; induction hob; 32-inch TV
MAX 2900 / 960 / Motorized lift-up / 960	6-burner grill; refrigerator; hood; induction hob; 32-inch TV
CUSTOM Compact 2278 / Manual lift-up	4-burner grill; refrigerator
CUSTOM Compact 2878 / Manual lift-up	6-burner grill; refrigerator; induction hob

Exact brand, model, cut-out, ventilation, service access, fuel and electrical rating must be approved. Listed appliance certification does not certify the complete kitchen system. Dimensions are planning references, not crate dimensions.

Materials and project options

PRO/MAX base configurations use galvanized-steel frames, aluminium cabinetry and exterior panels, and 304 stainless-steel worktop and sink. CUSTOM Compact uses an aluminium frame and cabinetry with specified aluminium honeycomb panels and a 304 worktop/sink. The complete product is not entirely stainless steel.

316 worktops, stainless cabinetry, colors, hardware and marble or sintered-stone interior/exterior cladding require separate engineering review and quotation. Cladding does not change the structural frame material and can affect weight, packing and mobility.

A practical path to partnership

Discuss your market and sales channel, select a suitable configuration, evaluate an eligible sample where appropriate, and confirm local demand and service costs before scaling. No automatic exclusivity, fixed retail price or guaranteed margin is created.

Quotation and delivery controls

Current EXW reference pricing applies to single units and containers without an automatic sample surcharge or container discount. Request a current quotation for your configuration. Standard payment: 50% deposit and 50% before shipment. EXW quotations are valid for 30 calendar days from email dispatch; DDP quotations have their own 15-day validity and destination conditions.

DDP is address-specific, with no universal US\$800 delivery charge. Confirm the named destination, crate data, clearance/tax scope and final-mile conditions in writing. Customer forklift unloading, positioning, assembly, installation, permits and local utilities are excluded unless expressly included.

Target production is about 30 days after the agreed payment milestone and written Technical Freeze. Transport time is additional and route-specific. Loading quantity follows measured packing data and an approved order-specific Packing Plan; no generic capacity is guaranteed.

Conditional sample credit

Only if expressly approved in the quotation/PI: an eligible standard PRO/MAX sample confirmed September 1-December 31, 2026 may receive equipment-only credit against a qualifying subsequent full-container equipment order within 6 months after sample shipment. No cash refund. Sample/LCL surcharges, packing, freight, insurance, clearance, duties/taxes, custom engineering, upgrades and installation are excluded. Other markets and CUSTOM need separate written approval.

Warranty and support

Eligible primary structures: up to 15 years; eligible finishes: up to 5 years; specified supplied functional components: 1 year. Aluminium cabinets, panels and frames are not automatically in the 15-year tier. Third-party appliances follow manufacturer terms. The applicable certificate governs coverage, care, exclusions and cost allocation.
